J3T

*Management*

THE CASE FOR

# *Owner-First Aircraft Management*

THE PREMISE

# *Most management firms profit from the invoices they ask you to pay.*

Fuel margin. Maintenance labor markups. Layered FBO and parts fees. Charter revenue splits structured to favor the operator. None of this appears on a statement called markup. All of it leaves the owner's account every year.

At the largest management companies, the visible monthly retainer is only part of how they're paid. The rest is buried in vendor invoices the owner is rarely positioned to audit.

J3T was founded to remove all of it. One retainer. Every vendor invoice passed at actual cost. No second revenue stream. No conflict.

THE SHORTAGE

# *Pilots come and go. The operator stays.*

Boeing's 2024 outlook forecasts a need for more than 670,000 new commercial pilots worldwide over the next two decades. The shortage at the top of the airline ladder pulls Part 91 captains upstream every year, and an owner who depends on a single captain to carry the maintenance history, vendor preferences, and regulatory state of the aircraft is now relying on a position with shorter tenure than ever before.

*670,000+*

NEW COMMERCIAL PILOTS NEEDED WORLDWIDE BY 2043

*2 to 3 yrs*

TYPICAL PART 91 CAPTAIN TENURE BEFORE AN AIRLINE CALL

*One*

PERMANENT OPERATING LAYER THAT DOES NOT TURN OVER

Pilots are excellent at flying. Few have a director-of-maintenance background, the records discipline of a corporate flight department, or the small-operations management experience required to keep ownership safe and efficient. When that work does sit with a captain, it leaves with them.

J3T is the layer that does not leave. One institutional memory. Records, vendors, and safety margins that do not depend on who is on the schedule this month. Owners who replace a captain every two to three years quietly lose more in transition costs than they pay in management fees.

*The flight deck will change. The operator should not.*

THE MATH

# *The retainer pays for itself.*

The annual direct operating cost of a typical super midsize jet runs between $1.2M and $1.8M. We have seen vendor markups at large management firms run from seven to fifteen percent on those pass-through line items.

WHAT THAT MARGIN CAN QUIETLY COST AN OWNER EACH YEAR

*$0*

J3T MARGIN ON VENDOR INVOICES. EVER.

*Owners typically recover the full J3T retainer through pricing transparency alone. The discretion, the expertise, and the singular accountability are unbilled.*

HOW WE OPERATE

# *Three principles. No exceptions.*

*01*

## *Discretion*

Who you fly, where you go, and what you spend is private. We do not operate charter. We do not share your information. Always.

*02*

## *Simplicity*

One point of contact. No corporate layers, no call centers, no runaround. Direct access to your manager for every matter, every hour.

*03*

## *Trust*

We are compensated by you, not by vendors. Every invoice is passed at actual cost. Every recommendation serves your interests alone.

THE INVERSION

# *Same airplane. Different incentives.*

Traditional management firms have two customers: the owner who pays the retainer, and the vendors who pay for placement on the firm's preferred-supplier list. The owner sees one of those payments. J3T has only the first.

TRADITIONAL MANAGEMENT

Owner → Retainer → Markup layer → Vendor invoices

J3T MANAGEMENT

Owner → Single retainer → Vendor invoices at actual cost

WHAT WE OFFER

# *Two programs. Nothing more.*

PROGRAM ONE

## *Maintenance Oversight*

For owners with crew in place who need an independent advocate on the maintenance side.

- Maintenance planning & scheduling
- Vendor coordination & invoice review
- MRO oversight & owner reporting
- AD/SB compliance tracking
- Records audit & management

FROM

*$1,500* / month

Scaled to aircraft and scope.

PROGRAM TWO

## *Full Management*

Complete Part 91 management. Crew, trips, maintenance, cost optimization, one relationship.

- Maintenance oversight & advocacy
- Crew placement & payroll
- Trip coordination & flight planning
- Fuel & FBO program management
- Monthly operating P&L reporting

FROM

*$4,000* / month

Scaled to aircraft and scope.

INSIDE THE FULL MANAGEMENT PROGRAM

# *What's actually included.*

## *Maintenance & Records*

- Annual MX forecast & budget
- MRO selection & bid review
- Line-by-line invoice audit
- AD/SB compliance tracking
- Logbook & records management
- Pre-purchase oversight (add-on)

## *Crew & Operations*

- Crew recruitment & placement
- Payroll, benefits, training cycles
- Trip planning & coordination
- Schedule management
- International ops support
- 24/7 owner-direct access

## *Cost & Vendor Management*

- Fuel program enrollment & negotiation
- FBO account management
- Insurance broker liaison
- Hangar & ramp arrangements
- Vendor consolidation
- Every invoice passed at cost

## *Reporting & Governance*

- Monthly operating P&L
- Hourly cost analysis
- Annual operating review
- Tax & entity coordination
- Owner-direct dashboard
- Quarterly strategy call

ONBOARDING

# *Effortless by design.*

A change of management should not feel like a project. The owner approves the engagement and signs one document. J3T handles the rest, in order, over the first thirty days.

| | |
|---|---|
| *Week One* | ***Records, accounts, baseline.***<br>Aircraft records audit. Vendor and account inventory. MX tracking system established. Insurance and ownership entity review. |
| *Week Two* | ***Transition & transfer.***<br>Vendor account migration to J3T-managed billing. Fuel program enrollment. FBO accounts confirmed. Crew check-in calls completed. |
| *Week Three* | ***First reporting cycle.***<br>Initial monthly report delivered. Cost baseline locked. Optimization opportunities identified and reviewed with owner. |
| *Week Four* | ***Steady state.***<br>Monthly cadence locked. Quarterly strategy call scheduled. Owner is in command; J3T is the operating layer that makes it quiet. |

A CONVERSATION, NOT A SALES CALL

*"We don't do sales calls. We do honest conversations. If it's a fit, you'll know in fifteen minutes."*

Text your tail number and what you're looking for. We'll take it from there. No forms. No follow-up sequences. No automated anything.
